

## Technology Assistant Manager @ LG Electronics (Technology Center Israel)

### Materials science, chemistry

#### Job description:

You will be looking for new technologies with the emphasis on chemistry and life science, to identify and evaluate relevant emerging technologies from external entities (universities, start-ups and industrial partners)

#### Your tasks include:

Active assist and support in the following areas of responsibility

- Scouting and evaluating innovative technologies developed in Israel in such areas as materials science, polymer science, solid state physics, organic, inorganic chemistry, biochemistry and others
- Engage with universities and the Israeli high-tech ecosystem to identify early stage technologies.
- Interact with startups to conduct early evaluations on relevant technologies.
- Preparation of technology and market studies/guide books as well as trend analysis reports
- Technical and commercial negotiations with relevant partners
- Coordinating and managing projects

These tasks are handled in close cooperation with the relevant teams of LG in Korea.

#### Qualifications:

- Highly motivated, creative and talented with a university/college degree, ideally with an exact science background.
- Fluent in Hebrew and have excellent written and verbal English skills.
- Very good team player
- Ability to handle multiple tasks simultaneously and effectively
- Ability to work autonomously when required.
- Highly organized with a strong attention to details
- Creative and open minded with ability to adapt to changing priorities / procedures.
- Knowledge of fields of technology especially in materials science, polymer science, solid state physics, organic, inorganic chemistry, electrochemistry and others
- Must be capable of utilizing excellent interpersonal, verbal, presentation and writing skills to successfully interact with and influence the organization, peers and senior management.
- Excellent MS office computer skills and multi-tasking ability.
- Willingness and ability to travel internationally.
